PROFESSIONAL SUMMARY

Senior Software Engineer in Test / Senior Quality Engineer with 9+ years of experience testing complex, high-trust web platforms across payments, cloud applications, mapping products, APIs, and data workflows.

Strong background in frontend and backend validation, exploratory testing, regression strategy, release readiness, and automation design using Cypress, Selenium, Postman, GraphQL, Jenkins, and CI/CD practices.

Known for partnering closely with product managers, developers, and QA teams to improve release confidence, debug production-risk issues, and build scalable validation approaches across UI, API, and service integrations.

CORE SKILLS

Automation & QA	Cypress, Selenium, exploratory testing, regression strategy, test design, quality gates, release readiness
API / Backend	Postman, GraphQL, API validation, service integrations, backend testing, ETL/data validation, SQL, MSSQL, Athena
Tools & Delivery	Jenkins, Git, Agile Scrum, Kotlin, Java, VS Code, IntelliJ, k6/Grafana collaboration, browser/network debugging

PROFESSIONAL EXPERIENCE

Senior Quality Assurance Engineer | KUBRA

Jan 2025 – Oct 2025

- Developed and maintained Cypress-based UI and API automation frameworks for Storm Center and mapping applications, improving test coverage and reducing manual regression effort by 40%.
- Designed and executed GraphQL API test suites in Postman to validate complex service interactions, data accuracy, and end-to-end user workflows.
- Performed manual, exploratory, and integration testing across geospatial modules to verify UI behavior, API responses, and mapping-layer consistency.
- Partnered with product and engineering teams on defect triage, release validation, and quality improvements in an Agile Scrum environment.
- Collaborated with performance QA to identify high-value scenarios for load and stability benchmarking using k6/Grafana.
- Mentored QA team members on Cypress test design, Git workflows, and test data strategy.

Software Development Engineer in Test | Plexus Worldwide

Jan 2023 – Dec 2024

- Automated regression coverage for large-scale web applications using Selenium and Kotlin, integrating suites into the CI/CD pipeline for faster and more reliable releases.
- Delivered in-sprint automation and feature validation to identify defects early and support continuous delivery schedules.
- Improved automation suite stability and pass rate from 64.77% to 75.19% within two months through failure analysis, debugging, and targeted fixes.
- Built end-to-end test cases with ETL/data validation to verify data transformations, backend accuracy, and migration quality.
- Worked closely with data engineers, developers, and product teams during sprint planning, reviews, and daily execution to maintain release readiness.

IT Analyst / Senior Quality Assurance Lead | Tata Consultancy Services (Citibank Client)

Mar 2016 – Aug 2022

- Led functional and automation testing for complex payment-processing ecosystems, validating critical financial transaction flows across interconnected systems.

- Coordinated UAT and end-to-end quality efforts across payment processors, settlement systems, and screening services, including SWIFT and ISO20022 message validation.
- Developed Selenium automation that delivered 72% cumulative time savings versus manual execution.
- Defined test scenarios across positive/negative, regression, interface, exploratory, and backend validation, with strong focus on release risk and business impact.
- Partnered with product owners and developers to translate requirements into quality coverage, feasibility assessments, and automation proof-of-concepts.

Project Engineer | Wipro

May 2015 – Feb 2016

- Supported QA activities for enterprise applications, including test execution, defect reporting, and collaboration with development teams.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering (ECE), Anna University | 2011 – 2015

Certifications: ISTQB; Agile at Work: Planning with Agile; User Stories

TARGET ROLE ALIGNMENT

- Large-scale web application testing across frontend, backend, and data layers
- Manual + automated testing, exploratory validation, and release readiness
- Cypress-based automation, API/GraphQL testing, CI/CD, and cross-functional collaboration
- Payments-domain experience and strong quality ownership in high-trust product environments
